EDUCATION

Vellore Institute of Technology, Chennai

B.Tech, Computer Science & Engineering (AI & Machine Learning); CGPA: 9.13/10

2023 – 2027

Chennai, India

EXPERIENCE

Software Development Engineer Intern – miniOrange

May 2026 – June 2026

AI-Powered WordPress Website Builder

- Architected and solo-shipped a full-stack, agentic AI website-generation platform (20,000 LOC; Python, FastAPI, React, PHP) as a production WordPress plugin, eliminating manual page-building for end users via LangGraph-based multi-agent routing with dual-layer intent parsing.
- Automated store management through a natural-language WooCommerce layer, while enforcing a confirmation-token and audit-logging system that reduced the risk of unintended, irreversible store actions to zero.

WE (Women Engineer) Program Scholar – TalentSprint & Google

Feb 2024 – March 2026

Selected – Top 1% of 30,000+ Applicants

- Completed a 2-year selective technical fellowship with regular coding sessions, tech mentorship, and corporate exposure sessions with industry engineers.
- Attended Google's Immersion Week, an upskilling coding bootcamp, and a team bootcamp building a mini project with Phoenix and Elixir.
- Delivered cross-college team projects, including WorthWise (financial decision-learning platform, see Projects) and a Kubernetes CronJob controller in Go.

PROJECTS

ClinSight AI – Semantic Patient Record Retrieval System

March 2026

- Stack:** Node.js, Express, PostgreSQL + pgvector, Groq, Google Gemini Vision, Sarvam AI, Socket.IO, OCR
- Engineered the OCR extraction and data-ingestion agents within an agentic clinical AI pipeline (2 of 7 agents; ~20–25% of ~19,000 LOC), converting fragmented and scanned patient records into structured, queryable data with a confidence-gating safeguard.
- Delivered the RAG-based retrieval layer (PostgreSQL pgvector, Vectra offline fallback) and a Sarvam AI-powered Tamil voice-intake agent, extending semantic search and patient accessibility beyond English-only interactions.
- Domain Winners** – GLITCHCON 2.0, HackerRank × MellonAI × Kathir Memorial Hospital × Arpina Solutions, outperforming 100+ competing teams. [GitHub](#)

WorthWise – Financial Decision Learning Platform

February 2026

- Stack:** React.js, Node.js, Express.js, Monte Carlo simulation, Groq Cloud API (Llama 3.3 70B), Supabase, JWT, REST APIs
- Co-built a financial literacy platform (~6,300 LOC) that models real investment outcomes, powered by a Monte Carlo SIP Simulator running 500 market scenarios per session to project best/average/worst-case wealth with inflation adjustment.
- Shipped a year-by-year Decision Simulator with LLM-based behavioural scoring and a Groq-powered chatbot (WorthBot) for real-time financial guidance, alongside a live market dashboard integrating FOREX rates, RBI repo rate, and mutual fund NAVs. [Live Demo](#) — [GitHub](#)

Fashion Compatibility Recommendation System

May – June 2025

- Stack:** Python, TensorFlow, Keras, BiLSTM, ResNet-18, Flask, Docker, Polyvore dataset
- Designed and trained a multimodal deep learning model fusing BiLSTM textual embeddings with ResNet-18 visual features via late fusion, achieving **72% accuracy** predicting outfit compatibility across 21,000+ Polyvore combinations.
- Shipped a full production web app (Flask backend + UI) with color/style harmony analysis and an explainability layer for styling feedback; deployed via Docker. [Live Demo](#) — [GitHub](#)

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, TypeScript

ML/DL Foundations: Classical ML (Regression, SVM, Decision Trees, Ensemble Methods), Deep Learning (CNN, RNN/LSTM, Transformers, GANs), Probability & Statistics, Linear Algebra, Optimization

AI/ML & GenAI: TensorFlow, PyTorch, Scikit-learn, XGBoost, NLP, RAG, LLMs, Agentic AI Systems, LangGraph, Sentence Transformers, FAISS

Web/Backend: React, Node.js, Express, FastAPI, REST APIs, WordPress/PHP

Data & Databases: SQL, Pandas, NumPy, MongoDB, MySQL, PostgreSQL, Redis, Pinecone (Vector DB)

Cloud & DevOps: Docker, Kubernetes, AWS, GCP, Git

ACHIEVEMENTS

- Domain Winners – GLITCHCON 2.0 (March 2026):** Delivered OCR, ingestion, and RAG components for ClinSight AI, outperforming 100+ competing teams. Team Fanatics.
- 2nd Place – DATAQUEST 2.0, VIT Chennai (Sept 2025):** Engineered an ML pipeline (XGBoost, LSTM, Isolation Forest) for insider threat detection. L&T EduTech. [GitHub](#) — [Live Demo](#)
